

## To Amalgamate The Municipalities

Premier Brownlee Announces  
Amalgamation Plan

EDMONTON, ALTA., June 22.—Abolition of the present system of small municipal districts in the province and the creation in its place of a system of "enlarged municipal areas," under which the 166 municipal districts now in operation, together with some 134 improvement districts, with some 148 improvement districts now administered by the provincial government, would be amalgamated into some 40 "enlarged" areas, thereby eliminating a large part of the cost of government both provincial and municipal, while increasing efficiency of administration, is proposed in a plan announced this week by Premier J. E. Brownlee. A series of municipal administrative costs alone of over a quarter million dollars or three quarters of a mill on the total rural assessment in the province is estimated, while the saving in administrative costs and in the costs of all public services will run into very large figures.

The proposal, which has already been before the provincial cabinet, and is now presented to the public by the Premier, this result of two years of rather exhaustive study and survey of the province conducted by an official of the Department of Municipal Affairs. The plan is entirely different from any scheme of large municipal organizations in existence in Canada or the United States, and is the first application of the principles of our present small municipal unit to the large area and continues the existing idea of only one authority for municipal administrative and taxing purposes. The plan as so far developed, will be in accordance with the last convention of the municipal districts association, be discussed further with the executive of that organization who have already been in consultation with the department officials in its preparation. It will then be submitted to the next convention of that association after which it is hoped it will be ready for submission to the next session of the provincial legislature. As a basis for discussion only, a map has been prepared setting out a plan of consolidation which appears reasonable and equitable to the departmental officials, but this map will, of course, be subject to adjustment, both as to the number of large units and their boundaries, as a result of further discussion. The new districts would be set up in accordance with certain fundamental principles, more or less as follows:

Grouping of localities having a common interest, and being of the same general agricultural and geographical classification as far as possible. Maintenance of the municipal boundaries along township and range lines save where natural boundaries such as rivers might more advantageously be used. Existence of sufficient population and assessable property so that each unit could function economically.

Consideration of the accessibility of the administrative centre.

Government of the units would be much the same as the

## Diamond D's Lose To Callies in League

Game Ended Two to One in  
Favor of Callies

In a league soccer game played Tuesday evening between the Diamond D's and the Callies the latter won out by 2 goals to 1.

The Callies had a number of changes in their line up and although some new blood was introduced they put up some good team work.

For the first half, play was very evenly divided. If anything the Diamonds had a slight advantage but, as the Alberta reporter said "they were a little cleverer with their foot work but persistent dribbling instead of getting rid of the ball, ruined the many fine openings they had offered them."

There was no scoring in the first half but early in the second period Melburn landed on a nice pass from Gee. Not long after Sowerby equalized on a pass from Podesta and for a time it looked as though there was going to be some heavy scoring, but only after a short time, as play was soon well mixed up again until Klemm, after making a nice save, failed to clear before Podesta rushed in and registered the winning goal.

The game ended 2-1, for the Callies.

## Board and Teachers Discuss Problems

Will Meet Again Friday to  
Complete Plans

Members of the congregation of St. Ambrose Church are asked to notice the change in the time of Sunday services. Until further notice the early celebration of Holy Communion will be at 9 a. m. instead of 8 a. m., and Evensong will be at 7 p. m. instead of 7:30 p. m. Other services will be as usual. The vicar hopes that those who are going to the lake or elsewhere for Sunday will make an effort to attend the 9 a. m. service before starting.

Mrs. Nice arrived in town this week to visit her parents. Mr. and Mrs. H. Johnson.

government of the present municipal districts.

One of the great benefits of the scheme would be the large economy in the cost of the administration, both provincial and municipal already referred to. Other advantages of the plan would be: A greater equalization of the tax burden. A more uniform and more equitable assessment of the lands in the area, since the judgement of the assessor would be applied over a very much larger area.

More uniform school levies and a saving in the administrative costs of education. A more co-ordinated system of road-building, the enlargement of the municipal areas making it possible to bring the roads into alignment with those of other districts and with the general provincial highway plan.

The plan, if adopted, would present, also, the opportunity for the review of the whole field of taxation as between the municipalities and the government. The possibility is suggested that the provincial government would abandon the field of real property taxation, leaving that to the jurisdiction of municipal councils, urban as well as rural.

## Swimming Pool Meeting Next Week

Will be Held in Legion Reading Room  
From Wednesday Evening

Enquiries are now being made as to when the swimming pool is going to be opened. This is a matter in which every parent in town and everyone interested in children, should be interested.

If young people have no place where they are comparatively safe for swimming they are going to go to other places which are extremely dangerous. This year with the river at its present dangerous depth and a new body of water just east of town, caused by the conservation dam there is no need for the swimming pool that ever before.

There is only one way to have the pool opened again this year and that is by the people taking an interest in it. A meeting is called for Wednesday evening of next week to be held in the Legion reading room and to commence at 8 o'clock. It will all depend on what encouragement the officers get at this meeting whether the pool will be opened or not this year.

Don't forget the night, the time and the place.

There have been no drowning accidents in town since we have had a swimming pool. There were many before and may be again.

Word was received in town announcing the death of Mr. Walcott Sr., at the time of Redcliff but latterly of Tampa, Florida.

On learning of his father's illness his son Ed left Hamilton, Ont. for Florida but did not arrive there in time to see his father alive.

## Local Cadet Corps Make Good Showing

Were Inspected Here Thursday  
Last by Major Miller

Major J. L. Miller, D. S. O., inspected the Cadet corps here last Thursday morning and the large number who attended the inspection were delighted with the splendid showing made by the boys in putting on their several drills.

All their work was exceptionally well done but the drill which especially appeared to the onlookers were the pyramids built by the boys and the girls.

The signaller also proved very proficient, scoring 92.

The local cadets won the provincial shield last year. As we go to press we learn that the shield goes to Basano this year.

Major Miller complimented the boys and girls on their splendid showing and said they were extremely fortunate in having such a capable instructor as Mr. King.

After the inspection lemonade was served by the girls.

Discharge certificates were presented to John Soukup as Cadet Lieutenant and to Dan Jensen as Cadet Sergeant.

Patrol leader, John Soukup, and his assistants, Jas. Brown, Dan Jensen, Len Larson, Jay Lowmes and Albert Podesta, deserve great praise for the splendid manner in which they conducted the several drills.

Elmer Congram, Geo. Kitchen, Ted Maskell and John Soukup, who formed the signaller group, showed themselves to be highly proficient in this work.

Mr. and Mrs. C. T. Hall left last week for here for Hamilton, Ont., where they will visit for a month. Mr. Hall's absence Mr. J. E. Steeves, of Edmonton, will be in charge of the drug store.

## Western Premiers Get Ready for Conference

Decide Must Buy From Empire  
If Want to Sell

If a market for Canadian products is to be secured at the Imperial Economic Conference at Ottawa next month, a market for the products of other parts of the Empire must be opened up in Canada.

This was one of the conclusions reached by the heads of the four western provinces meeting to discuss submission from the west to the Imperial gathering.

Discussions at the meeting covered a wide range of subjects, including stabilized currency, the live cattle industry, the livestock industry, the dairy industry, establishment of a permanent inter-Empire board and the lumbering industry.

"It was the feeling of those in attendance," said Premier J. M. Anderson of Saskatchewan, "that the 'moving hicks' of that it was most important that all Canada should speak with a united voice in the matter, but should realize the absolute necessity of concessions being asked from the other parts of the Empire, and that it was not sufficient to expect from the conference that a market should be secured for Canada products unless in return a market is offered for the products of other parts of the Empire by Canada, particularly for the products of Great Britain."

Mr. and Mrs. C. T. Hall left last week for here for Hamilton, Ont., where they will visit for a month. Mr. Hall's absence Mr. J. E. Steeves, of Edmonton, will be in charge of the drug store.

## Brick & Coal Will Finish Football Season

Select New Officers to Carry  
Out The Schedule

Football fans were surprised and disappointed to learn that a rumor was in circulation to the effect that the Brick & Coal football team was contemplating disbanding for the season, owing to uncertainty of the necessary players to carry on. On learning this a number of citizens got together to discuss the situation and the result of their efforts has been most satisfactory as was mentioned in a previous issue.

Like many other of the same rumor's doings, the circumstances were not as serious as was thought and after a few of the wrangles were ironed out the enthusiasm and tranquillity of a Sunday School picnic was in sight. This year a new executive was elected and it was decided to carry on for the balance of the season as per the original schedule as the Brick & Coal team and not under the auspices of any other organization, was mentioned in the News. The following officers were elected:

Non-Presidents—C. G. Buchholz and A. E. Shaw.  
President—A. G. Osagood.  
Vice-Pres.—W. Evans.  
Sec. Treas.—J. J. Campbell.  
Ex. Com.—B. Allison, Harry Champ-B. Woodcock, Ed. Stone.  
Trainers—J. McFadden and Geo. Cook.

Rep. on Council—T. Dutton.  
Social Com.—E. T. Cooke, W. Balmer, W. J. Campbell, T. Spence and Geo. Cook.

Most of the old Brick & Coal players signalled their willingness to stay with the team and were most enthusiastic over the prospects of happier times in the league to the end of the season. Old officers also promised whole-hearted support to the new officials and the players. A vote of thanks was unanimously tendered to the retiring officials and also to the new executive for the interest they had shown in the players and the game.

At present the Brick & Coal are a tie at the top of both the league and the Five Roses.

In the mean time, two games in which the Bricks were drawn were postponed. These were both in the Five Roses cup.

The first, which was with the Diamond D's will be played next Monday evening, and the other with the Legion, the end of the

Mr. and Mrs. Joe Dutton, of Mountain Park, are at present visiting the former's parents, Mr. and Mrs. T. Dutton, here.

Miss Martha Balmer, who has been residing in Regina for some time past, returned home last weekend.

Mr. and Mrs. McKeller, of Brooks, spent last weekend in town the guests of the latter's parents, Mr. and Mrs. G. McKeller.

Mrs. Percy Rand, of Summerland, B. C., who has been visiting her parents, Mr. and Mrs. D. McLachlan for the past two months, returned home Monday.

The light fingered gentry were busy in town again last Saturday. They stripped Bill Kayes' car of three tires, all the tools and one of the cushions. They also entered J. Thorpe's garage the same night and stole cases of soft drinks and drained his gasoline tank.

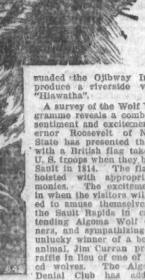

## Howl, Wolves, HOWL

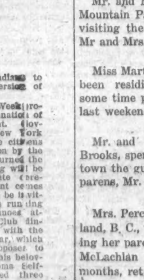

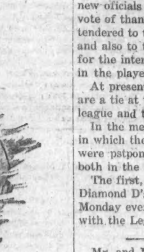

Jim Curran, Editor of the South Daily Star, believes with Old Sam Martin that "a man who says he has been bit by a wolf is a liar."

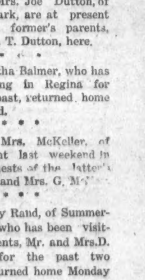

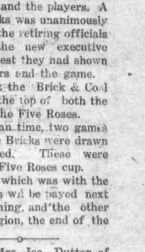

Jim Curran, as an expert on wolves, so much so, indeed, that he has persuaded the Star to hold a Wolf Week, July 25-30. That is the kind of a week it's going to be. Jim Curran, the wolf expert, says it will be worth attending that the South is the friendliest

town in Canada, and that respectable strangers will be welcome. Plus this will not be practical business during Wolf Week at the South. This is a warning, and it is understandable as a show where the background is totally composed of wild wolves. Indeed and whether Jim Curran and his fellow-wolfers of the friendless have cornered the world's best professional long distance runners for some real racing, and have put

rounded the Highway Indians to produce a side-show version of "Wolf Week."

A survey of the Wolf Week program reveals a combination of sentiment and excitement. Governor Roosevelt of New York State has presented the citizens with a British flag taken by the U. S. troops when they turned the South in 1811. The flag will be hoisted with appropriate ceremonies. The excitement comes to a head when the citizens will be invited to amuse themselves during the South Regatta in canoe, attending Algonia Wolf Club dinner, and sympathizing with the industry winner of a hat, which animal, Jim Curran proposes to battle with the spirit side in the South, which Jim Curran says is built to be the most important in the great Algonia forest, near the timber wolves.

## Seems Like Strange Plan

Many Men In Public Offices Have No Training For Work

We have read in a number of papers that we are over-governed; the contention is that there are too many people working in it, and with that idea we are inclined to agree.

And yet there is something more amazing than that. How little schooling or preparation there is for those who undertake to do the governing.

Look at it this way: A young man decides that he will become a politician, and to that end he is apprenticed to his trade. There he spends a term of five years learning the business. There are many things he must know before he is considered competent, and not until he has finished his time and passed his examinations is he considered competent to hold a position. We pursue the same plan in a good many other lines of business. There must be that period of training and it is necessary.

We have nothing like that in the way of preparing men for public life.

A man may be a farmer, an editor, a lawyer, a merchant or a manufacturer, but he is not a politician until he has been elected to the House of Commons or the Legislature. He does so and is elected.

Then it is that he is face to face with the problem of taxation, of the scientific application of tariffs, of passing opinions on trade treaties with other lands. There has been very little in his former experience which has led to this as an expert in such matters. He has never served his apprenticeship. He really cannot tell how to apply taxation without being confronted with the law of diminishing returns; in a general way he understands tariffs, but he is probably not a high tariff or a low tariff man according to the policy of his party. He may bend himself industriously to a study of all these affairs, and yet there is always the possibility that at the next election he will go out and not return. His place may be taken by another who has no training in the serious business of government. And yet our whole system of government is based on using untrained men, and the wonder is that we get along as well as we do.—Stratford Beacon-Herald.

## German Method Modern

Railroads Have Quick Way Of Fumigating Coaches

The Germans, always seeking a new and better way of doing a task, have adapted a modern method of killing germs in railway coaches. In other days the interiors of coaches were scrubbed with soap and water and ammonia, and then fumigated in a long period with sulphur gas or some other similar germ killing vapor. But now the German railroads do the job more scientifically and in much less time. At several places along their main lines the German officials have had installed artificial chambers into which cars can be switched. When the coaches are inside, the openings are sealed and poison gas admitted to the chambers. The gas kills all germs, and the cars are switched out and the passengers are advised to open the windows and the scrubmen who complete the job of re-ventilating. The whole process requires only a few minutes.

## Had Wonderful Time

A woman arriving at a tea the other day from her club meeting was being queried about what took place.

"Well," she said, "there was record attendance, but I don't know how many were there. There was a lovely programme, but I can't remember the name of the singer or what she sang. And somebody spoke about the government, but you know, you hear these speeches and you yawned at the things but they leave you."

"But you had a good time."

"Oh, lovely."

The Canadian Bureau of Statistics estimates the gross agricultural wealth of Canada for 1931 at \$4,768,466,000.

"These Louis XV. shoes are rather odd, there are some Louis XV."—*El Travieso*, Toronto.

## LORD WAKEFIELD ACCEPTS DELIVERY OF MISS ENGLAND III.

The new wonder, speedboat, Miss England III, is shown during the ceremony of being delivered to her owner, Lord Wakefield, at Hampton-on-Thames. Says Don, the famous British speedboat driver, will attempt to break the existing world's record of 111 miles an hour sometime this month. Lord Wakefield can be seen reading a short address during the ceremony while Says Don (with hat on) listens.

## Re-Charging a Gas Field

Turner Valley Surplus Gas Forced Back Under Own Pressure To Bow Island Field

The interesting experiment of re-charging an exhausted natural gas field is being carried out in Southern Alberta. For years the City of Calgary and other centres of population were supplied with natural gas from a field at Bow Island, Alberta. This field was exhausted but in the meantime this field is producing more natural gas than can be used and, to conserve it, a certain amount is being forced back under its own pressure into the Bow Island area. The extent to which the Bow Island field is being re-charged amounts to about 5,000 cubic feet per day.

Wet gas is found in the Turner Valley field, and the pressure is being applied to the Bow Island field at depths of 3,500 to 6,000 feet. The gasoline content is extracted from the gas and the remainder, after supplying the City of Calgary and other points, is in the past, been burned to prevent pollution of the air. These gas becomes burning day and night gave to Turner Valley the title "The World's Greatest Town." Among the conservation plans now being carried out is the re-charging of the Bow Island field, where the gas can be kept in storage for an indefinite period and drawn upon again if and when required.

## Pays Big Dividends

Poultry Has Played Large Part In National Life of Canada

T. C. Eford, Dominion Poultry Husbandman, and an outstanding leader in poultry development in Canada, on a recent occasion observed that few people realize what a big part the hen has played in the national life of Canada. "There are many prominent Canadian business men who would not be where they are if it had not been for the hen on the farm at home," he stated. "The poultry provided the money for shoes, and silks and pencils, and were in fact responsible for keeping them at school. I myself do not know of any other business today which pays better dividends than poultry raising, and I believe the prospects are still encouraging."

## A School For Divers

Course Lasts a Year and Instruction Is Thorough

Italy has, at Spiccia, the biggest school for divers in the world. The divers, who are 2, 3, 4, and 5, and 6, have to undergo a test of two hours' work at a depth of 125 feet under water, wearing 185 lb. diving suits before they are passed out. While diving apparatus has been perfected during the last century, rudimentary forms of it were used as long as the time of Alexander the Great. An Englishman, Roger Bacon, is believed to have invented the original diving-bell about the middle of the thirteenth century. Divers have many perils to face, and instruction is given in the Italian diving school in the difficult art of fighting sharks and other sea monsters.

New Way To Sell Potatoes

A recent market report from Toronto states that the Alliston Branch of the Central Ontario Potato Growers' Marketing Association has sold a quantity of Canada fancy potatoes in 10-lb bags which retail at 18 cents each in Toronto. This is at the rate of 45 cents net on the basis of the standard 10-lb bag or considerably above prices obtainable in ordinary conditions.—Economic Analyst.

## Four Countries Of Experience

Have Been More Valuable To England Than Wealth

As the only two dollars of gold for each dollar of debt as against Canada's six dollars of wealth for each dollar of debt, and "United States" offers dollars of wealth for each dollar of debt. But she has behind her something that none of the rest of the world has and that is 40 years of experience and world leadership.

For centuries the best brains of England have gone into government. Just as the best brains in North America have gone into "business" somewhere between the two extremes probably lies the best middle course.

But England is pulling through. She is facing the music, making her sacrifices and coming out on top. The whole world wishes her well.—Vancouver Sun.

## Eat Our Weight In Meat

Average Person Consumes Over Weight In Meat Each Month

Canadians consumed 148.46 lbs. of meat per person during 1931 in comparison to 145.44 lbs. per person in 1930. Increases in the consumption of pork, mutton and beef were shown with a decrease in the consumption of poultry. Consumption of poultry per capita in Canada during 1931 was 11.04 lbs., an increase over the per capita consumption for the years 1928, 1929 and 1930. These figures show rather conclusively the general contention of experts that the normal healthy individual eats his own weight in foot each month, and on this basis it would appear that most necessary food for the human diet. Department of Agriculture.

## Made It Plain

Jones was recently sent by his employer, a wholesale purveyor, to select a suit from a stock of 1,000 suits. He was not a retailer, notorious for his slowness in making payments.

After several vain attempts to obtain a settlement, Jones remarked, "Well, let me just let you know on what date I may expect payment."

Smith replied: "Do you take me for a prophet?"

"No," responded Jones. "Up to the present my firm has always regarded you as a loss."

Switzerland imported \$1,068,061 worth of office appliances last year.

## Employment Figures

Show Slight Increase

According to Report Compiled For Labor and Commerce Department

A gradual diminution of unemployment is indicated by figures compiled for the Department of Trade and Commerce, Hon. H. H. Stevens, stated to the House of Commons. Figures given before the political convention at Toronto, indicating that the number of unemployed in Canada is over 700,000, appear to be "very wide of the mark," the minister added.

Figures of industrial employment, supplied from returns of some 5,000 firms in Canada, indicated a gradual, though not very marked, increase. In December, 1931, the figure was 414,154, while in April of this year it had risen to 424,880. The index figure of employment also showed an advance.

The unemployment figure of the census, said Mr. Stevens, showed unemployment in towns and cities over 5,000 at 58,474. This was taken in June, 1931.

## Favor Canadian Cattle

British Importers Would Take Many Thousands From West

According to William R. Rogers, of the British Empire, of Manchester and Birmingham, the largest importer of Canadian cattle in the British Isles, his firm can take many thousands of Western cattle of the quality seen in the Leithridge and Raymond district, during his visit through these regions. "Of 20,000 head of beef cattle imported last year," said Mr. Rogers, "our firm bought over 14,000 head. We have been handling Canadian cattle for generations. We like them and would like to get more of them as we have just seen." The British imports of these cattle might be quadrupled, he thought, if the proper rules are observed. Young stock—300 pounds live weight or less—now chiefly in demand, as contrasted with the 1,000 and 1,600 pound animals of former years. Most of the cattle shipped from Canada so far this season have been on order from this company.

## Exceeded Her Allowance

Restaurant Keeper Frothed By Accepting Vacuum Cleaner For Meal

The wife of a retired naval commander dined for a week at a London restaurant, and paid her bill with a vacuum cleaner.

Her husband and she recently decided to leave London and live in a cottage in the country where there is no electricity. Their electric vacuum cleaner consequently was useless.

The manager of the restaurant where she is a patron listened to the story.

"Madame can dine here throughout the week in exchange for the cleaner," he said.

She dined night after night at the restaurant, and then an embarrassing discovery was made. The wife found that her bill had at last exceeded the value of the cleaner.

The balance was paid in cash.

Alberta Sets New Butter Record

Final figures of butter production in Alberta for 1931 amount to 22,097,929 pounds, which is more than 600,000 pounds above the previous highest year's record for the province. Closely associated with butter production is a movement inaugurated by the Federal and Provincial Departments of Agriculture to encourage farmers to enlarge their forage crop areas. Between 300 and 400 farmers in various parts of the province will this year plant plots of alfalfa to grow special crops of forage from seed selected with the object of increasing the amount of forage crop seed available in the province.

"How is your husband?"

"I don't know. I haven't seen him for five years. The last time I saw him I must have said something to annoy him."—*Die Muckete*, Vienna.

## The Mighty Apostrophe

Placing Of It Makes Vast Difference In Meaning Of Word

There seems to be lack of uniformity as to whether the second fundy in May is "Mother's Day" or "Mother's Day." Advertising matter had it both ways, and newspapers do not seem to agree on the point. It doesn't matter much anyway.

The rightful places of commas, full stops and apostrophes sometimes have tremendous results, and there was a time when the good people of the Free Kirk of Scotland were almost in a tumult over the use of an apostrophe.

It was shortly after the objecting element of the Free Church of Scotland, better known as the "Wee Free," having refused to join with the United Presbyterian Church of Scotland to form the United Free Church, took legal steps to obtain possession of the entire property of the original Free Church. The Scottish Court of Session decided against them; but they appealed to the House of Lords, which reversed the judgment and decided that the "Wee Free," a mere handful of congregations, was entitled to church funds and the property worth \$100,000.

There was tremendous confusion among the "Wee Free" at this voting, and at a celebration meeting of their most distinguished ministers said: "It was the Lords doing." It never occurred to the reporters that the speaker was declaring that the question of an apostrophe would arise. But when they came to transcribe the notes they were faced with the problem of whether the speaker meant it was "the Lord's doing," or "the Lords' doing." Did he mean the Lord, or the House of Lords?

Most of them agreed among themselves it makes it "the Lord's doing" and the address went out to the world that way. A rumpled development when ministers on the other side read into it that the speaker practically claimed that the Lord was on the side of the "Wee Free," against the Free Presbyterian Church, that it was a crippling blow. The speaker did not explain matters, so the probability was that he did mean it was the Lord's work. However, a year or two later the property was more equitably divided by a special Act of Parliament.

It was not long after that the "Lords' doing"—St. Thomas Times-Journal.

Exceeded Her Allowance

Butler: "I'm an actor."

Stern Father (angrily): "Then get out before the foot lights."

The Red Cross band of Linton, England, has been directed by the British war office to change its name because under the Geneva convention, the words "Red Cross" are restricted to army medical services.

The world's largest radio tube, made of iron and steel instead of glass, has been built for a radio station in laboratories at Manchester, England.

"How is your husband?"

"I don't know. I haven't seen him for five years. The last time I saw him I must have said something to annoy him."—*Die Muckete*, Vienna.

## Great Bear Lake Pitchblende

Nationalization of Radium Ore Is Advocated in Commons

Nationalization of radium ore in the Great Bear Lake district was advocated in the House of Commons recently. Members of the Progressive group pointed to the enormous quantities of pitchblende to supply radium to the entire world and break the existing Belgian monopoly.

The government is fully aware of the value of the deposits to supplying munitions, said Hon. T. G. Murphy, Minister of the Interior. But he added, "as to what method will be adopted to secure for Canada the benefit which is justly her due, I am not in a position to say. This matter is actively engaging the attention of the government and we are prepared to take all necessary steps to make radium available to the (cancer) sufferers of Canada at the lowest possible price."

The pitchblende deposits are in the hands of private individuals, proceeded the minister, and the extent and richness of the district has not been determined. It must be remembered, he proceeded, that prospectors had discovered the deposits and, under the law of Canada, they acquired certain rights. "These rights," he added, "must be respected."

In introducing the question, H. N. Campbell (Pro. MacKenzie), quoted the Ontario canon commission as saying it had been estimated that Canada to be totally inadequate. World prices fluctuates about the \$70,000 a gram. It had been estimated that a Canadian field could be worked at a profit at \$82.00 a gram.

Canada owes it as a sacred duty not only to our people but to suffering humanity throughout the world to prevent these valuable resources falling into private hands," said Mr. Campbell, "or at all events to see that if they do fall into private hands, they are properly controlled by the government."

William Irvine, United Farmer member for Wetaskiwin, remarked that a few pounds of radium could pay off Canada's national debt.

## Danger In Grain Dust

Mixed With High Proportion Of Oxygen Becomes Highly Explosive

Grain dust alone is perfectly harmless, but when it is mixed with oxygen it becomes highly explosive. Then any kind of external heat reaching the explosive point of the dust-oxygen mixture creates rapid combustion, which, in a confined space, is an explosion. The heat to create the explosion may be caused by static electricity developed from friction, by defective wiring by a broken light bulb or by the light of a match or a cigarette. When a mixture of grain dust and oxygen explodes there is no wall or roof that can stand against the terrific blast. Huge concrete blocks are hurled many yards by the force of the explosion.

## Munitions Depot Isolated

Unusual Location Chosen By U.S. For Greater Safety

Hundreds of miles from any ocean is located the newest United States naval munitions depot. It is in the centre of 221 square miles of Government land at Hawthorne, Nev. Just to the north of the naval storehouse is Walker Lake. The unusual location of the depot, far from the fleets which it serves, is due largely to the factor of safety. Here in the desert explosions would do only local harm. At a seaport they would mean a catastrophe.

Traveller—"What's the use of you having time tables if your trains don't run on it?"

Porter—"Now you're all excited. How could you tell your train was running late if you didn't have a time table?"

When the worms turn, he mistook either a chicken or a babarman.

WORLD HAPPENINGS  
BRIEFLY TOLD

To economize in League of Nations expenses a measure proposed by Great Britain has been sent to the supervisory committee.

A bill amending and consolidating the fisheries act was put through the committee stage and given third reading in the House of Commons. There was little discussion.

Millers of north and central Italy are now allowed to use 75 per cent of import grain, south Italy 85 per cent. While in Sicily and Sicily restrictions have been entirely lifted.

To take possession of a fortune of about \$150,000,000, a white-haired Armenian woman, Marianne Djankian, 80, has gone to India with her two sons.

Hope that 1932 would prove historic in drawing together all citizens of the British Empire was expressed by J. H. Thomas, Dominion Secretary, in an Empire Day address.

Shanghai was completely isolated from the rest of the world as far as mail is concerned, when the Indian postal workers joined the outdoor workers in a strike.

Attempts to find the abandoned Hudson's Bay Company fur ship "Baychino," and the salvaging of a rich fur cargo believed to be aboard, have been given up by William H. Graham and Mrs. Edna Christoferson.

Several thousand feet above the city of Chicago a youth killed himself in an airplane recently, because his dreams of becoming an aviator had come to naught. He shot himself to death.

In the first case of its kind ever brought in district courts, Angus D. Graham paid \$5.25 in county tolls, court at London, Ontario, because he is said to have forgotten to put a stamp on a cheque.

## New Earl Of Eglmont

Has Inherited All His Father's Troubles In Connection With Estate

The new Lord Eglmont is a pitiable figure. He made friends with no one but his father, and now he can hardly say lonelier boy in the world than this 18-year-old earl. He avoids all society, and has a terror of publicity.

He will have all his father's troubles and more, for death duties must again be paid on the Eglmont estate. His father was staggered to find the estate reduced in apparent value from \$2,000,000 to \$1,500,000 due to death duties and settlements on two dowager countesses.

Father and son shot rabbits and pheasants on the castle estate and sold them to neighboring villages to help meet expenses. The boy, who never had a mother's influence, had practically no education or experience of the world, and who has been embittered by the cruel disappointments encountered since reaching England, is left to cope with the problems of a large though impoverished estate.

## Disastrous Economy

Demand For Products Cries When Advertising Is Stopped

The most advertised manufacturers are the ones most asked for. Stores which advertise the most are the most frequented and prosperous. Their prices are no higher than at the other stores. Often they are lower for the precise reason that their advertisements bring them a bigger clientele and, as their sales are therefore far more, they are in a position to be content with a smaller profit on each sale. It was never so important to make sure that we do not become discouraged, and to go ahead with our business and keep money in circulation. How can we expect to succeed if we cut down on our advertisements which create the demand for the products of industry and commerce? This would be a false economy, an economy which would be disastrous.—Le Droit, Ottawa.

## WHERE TO SPEND AN ENJOYABLE VACATION

Canada-Inland

SINCE the annual vacation has become a definite part of modern life, the decision as to where it will be spent is of considerable importance.

Canada has a particular appeal to the vacationist, for it has an unusual variety of attractions, which may be enjoyed at reasonable cost.

For most people, the summer vacation is limited to a few weeks and is really shortened by the time used in travelling to and from the locality selected. Canada has an extensive ap-

tem of good roads and excellent railway service which greatly facilitate travel between provinces.

Canada presents a striking diversity of natural features—the rugged and picturesque Atlantic Coast, the St. Lawrence River and Great Lakes, the world's greatest inland waterway; the Laurentian Mountains, land of forest and stream; the prairies; the majestic Rockies; and the beautiful Pacific Coast. Each of these areas has its own attractions of scenic beauty and opportunities for enjoyable recreation. Fishing, hunting, camping, canoeing, and mountain-climbing may all be enjoyed under ideal conditions, while golf and tennis may be played conveniently everywhere.

Accommodation includes everything from camp site to luxurious hotel. Those to whom economy is a matter of concern may spend a pleasant vacation close to nature, at surprisingly small cost.

The National Development Bureau, Department of the Interior, at Ottawa, has prepared a series of automobile road maps, showing the main routes from one province to another, also a number of interesting booklets, including "Vacations in Canada," which describe the tourist attractions of each province. These will be sent to any of our readers planning a vacation. Applicants should state the areas in which they are interested.

Repair Vessels At Esquimaux

Summer Overhaul Of C.P.R. Pacific Steamers To Be Made In Canada

Summer overhaul of the Canadian Pacific Railway's Empress liners which will take off Vancouver, will be done at Esquimaux instead of at Hongkong, it is announced by Capt. E. Aikman, general superintendent of the Canadian Pacific Steamships, Ltd.

The general overhaul, which takes place every winter, will be done in the Orient.

The decision, which will bring additional employment for British Columbia workmen, has been reached by agreement with the Dominion Government.

The government has made concessions regarding dock dues and the Canadian Pacific Railway has undertaken to pay the additional cost of labor, which is nearly five times as expensive as in the Orient.

The new policy will become effective with S.S. Empress of Russia which will go into drydock on July 15. She will be followed in turn by S.S. Empress of Japan, S.S. Empress of Asia and S.S. Empress of Canada.

A "full view" mask, in which the wearer can see on all sides, has been developed in Germany. The new mask is made of a transparent material which takes the place of rubber and fabric in the old mask.

Bird houses may seem attractive if painted red and other gay colors but the birds are more apt to come to live in houses that have a rustic or weathered look.

The city of Bahia, in Brazil, has a 240 foot elevator tower which carries pedestrians from the streets by the bay up to the streets on the hill.

This darling dress calls for the minimum of material, and as far as the making—well, you can see for yourself, it's a child's play!

The dress with deep armholes and deep square neck has an attached yoked skirt. A French blue and white batiste print with deep blue findings was used to fashion it. The separate gumpie with darling puff sleeves was of pale blue sheer batiste. Small daughter can indulge in numbers of gumpies, for instance a white one dotted in blue would be lovely. Then again, it would be entirely different and very unusual with the gumpie made of white batiste-striped in the deeper shade.

Style No. 435 is designed for sizes 8, 10 and 12 years. Size 10 requires 1 1/2 yards of 36-inch material for dress with 25 cents in slings and 3 1/2 yards of binding.

Price of pattern 25 cents in slings or coin (cash is preferred). Wrap coin carefully.

## Canada's Newest Metal

Latest Addition To Many Refined Products Is Selenium

Selenium is the latest addition to the numerous refined metal products now being produced in Canada. It is obtained as a by-product in copper refining and was produced for the first time in Canada early in 1931 at Copper Cliff, Ontario.

Canada is now in a position to produce selenium in large quantities but the market for any output is at present restricted, according to Mr. Arthur Hudson of the Dominion Department of Mines, Ottawa. Further researches to develop new uses will undoubtedly create a wider market for this relatively new commercial product.

Selenium is not very abundant in nature, although fairly widely distributed. It is found associated with sulphur compounds and often accompanies the sulphides of heavy metals in the form of selenides. In the electrolytic refining of copper it remains in the slimes or residue from which it is afterwards extracted. In its metallic form it is characterized by a unique tendency toward light, which has made possible the development of the photo-electric cell or "electric eye."

Selenium is a fine, greenish-grey metal in the glass industry where it is used as a colorizer and for neutralizing other colors; it is also used in the pottery industry for the same purpose. In the manufacture of rubber products it serves as a vulcanizing agent, accelerating agent, and because of its reputed properties of increasing the resistance to abrasion of rubber it is as much as eight per cent, it may have a large potential market in that industry. One of the most important potential uses is in the production of selenium cells for television transmission and reception.

## Britain and Disarmament

Says Natives Of Europe Would Like To See Britain's Army And Navy At Greater Strength

Mr. Lansbury distinguished himself (in a debate upon the British Government's foreign policy) by asking more of those questions which prove that he has not yet learnt the art of sitting gracefully on a fence. "Against whom are we arming?" The painful crudity of this inquiry drew down on him a severe rebuke. "That," said Sir Austen Chamberlain, "was rather a dangerous question, and it would be more dangerous for the Foreign Secretary to answer it."

However, Sir Austen was not quite sure that no nation was arming against us. On the contrary, there was "not a nation on the Continent of Europe" which would not like to see the British army and navy bigger and better all round. As a comprehensive testimonial to our own little goodness amid a naughty world of lies there's nothing to be desired. "Not a nation," it seems, would not wish more power to our strong right arm. Is it not, then, a little curious that they do not all give effect to this wish by reducing their own armaments they would increase ours. What could be simpler?—Manchester Guardian.

## A Hundred Point Man

Is True To Every Trust And Safe Person To Deal With

"A Hundred Point Man" is one who is true to every trust; who keeps his word; who is loyal to friends and to those who employ him; who does not listen for insults nor look for slights; who carries a civil tongue in his head; who is polite to strangers, and is never "fresh"; who is considerate towards employees; moderate in eating and drinking; who is always willing to learn; who is cautious and yet courageous.

Hundred-point men are safe men to deal with, whether they be chauffeurs, motor men, clerks, cashiers, engineers, teachers or presidents of this and that.

## Loyalty In India

Unfavourable Carry British Flag At Head Of Procession

British residents of Poona, India, were stirred recently by the sight of a huge Union Jack fluttering at the head of a purely Indian procession. It was the first time such a thing had occurred at Poona for many years.

The procession, which comprised thousands of unfavourable, was in honor of the homecoming of M. Ambedkar, a representative of the unfavourables at the recent Indian Round Table Conference in London.

The nations are now shouting for occasion, but they are still armed to the teeth.

The capital of the new Manchurian state is Changchun.

## Civil Service Act

Private Secretaries Of Cabinet Ministers Will Absorb Into Service

Private secretaries to cabinet ministers who lose their positions when there is a change of government will continue to be absorbed in the civil service provided they have served three years with a minister. The Civil Service act as at present worded enables a secretary to obtain a position in the service in a class not lower than chief clerk any time after he has served one year.

The absorption of private secretaries into the service has caused much protest and a great deal of discussion in Ottawa; defenders of the merit system have contended that it is unfair for private secretaries who have never passed a competitive examination to be placed over the heads of old employees in the departments thereby preventing them from being promoted.

When the question was considered by the civil service committee of the House, it was decided to recommend that private secretaries of cabinet ministers into the service without an examination be discontinued. When the recommendation came before the House of Commons in committee it met a storm of protest. It came up when the bill to implement the recommendations of the committee was before the House.

Members on both sides of the chamber seemed to agree on the principle that a cabinet minister was entitled to a secretary of his own choice in view of the confidential relations that must develop between them. For this reason there must be many disloyal private secretaries and the ground taken by those members supporting the secretaries was that it would be unfair to put them out of the service entirely when a government changed.

## Forgotten Soldiers

War Office Evidently Over-Looked Some Detailed For Special Duty

The smashes have been more than one case similar to the story told by Mr. Cedric Hardwicke in his recently published autobiography, of the two British soldiers who, detailed to look after a rifle range at Havre in 1914, remained there forgotten until the war had ended. During a hotel there, he was surprised to see at a nearby table a British captain in uniform. They got into conversation and he said that he had been sent there in 1918 and was convinced he had been forgotten by the War Office. "Why don't you get in touch with London?" asked the writer. "Why should I?" was his answer. "This is a cheap place to live to."

## In Plain Language

Congressmen have over-speaker of the House, whose pet aversion is pussyfooting, once conducted an investigation in which he expressed doubt of the truth of the witness testimony. Later a reporter not at the hearing, interviewing Garner, asked the congressman if he had questioned the veracity of this witness.

"Yes," said Garner. "Did you express doubt of his truthfulness?" the reporter continued. "I should say not."

"Did you tell him you suspected him of falsifying?" "By no means," says Garner. "I told him you were a damn liar, if that's what you mean."

Scientists have discovered that gasoline can be manufactured from cotton.

We owe the introduction of sugar cane into Europe to the Arabs.

Unfavourable Carry British Flag At Head Of Procession

British residents of Poona, India, were stirred recently by the sight of a huge Union Jack fluttering at the head of a purely Indian procession. It was the first time such a thing had occurred at Poona for many years.

The procession, which comprised thousands of unfavourable, was in honor of the homecoming of M. Ambedkar, a representative of the unfavourables at the recent Indian Round Table Conference in London.

The nations are now shouting for occasion, but they are still armed to the teeth.
